

Faster. Smarter. Optimized for AI. The World's Most Innovative Data Capturing Solution Built for Google Pixel

With a commitment to business modernization and longevity, IPCMobile + Google Pixel for Business partnered together to codevelop a multi-use, smart scanning solution to simplify complex workflows and meet high demands.

Combining Cutting-Edge Hardware and Intuitive Software

PUSH TO AI

Smarter hardware with programmable buttons that allows users to trigger specific data collection and optimize workflows – no matter what application is in the foreground – powered by Google’s tech stack and Tensor chip.

INTELLIGENT DATA CAPTURE

Less limitations when leveraging AI to inspect camera frames, recognize speech, and scan barcodes – count/locate/detail items, capture complete forms, recognize objects, verify IDs/VIN/TINs, and so much more. Built with the latest contactless technologies – NFC/RFID – LPG can locate beacons and is primed for Google Smart Tap/Apple VAS.

REAL-TIME COMMUNICATION

Integrated with the leading Push-To-Talk carriers – including TMO/ATT/VZW – LPG enables users to relay information at the click of a button. From the frontlines to the warehouse, on the road or in the air, mobile teams can communicate in real time – even in the most critical situations.

ALL DAY POWER AND RELIABILITY

Hot-swappable smart batteries, with a charging ecosystem that includes MDM/sync via ethernet, gives teams 24/7 uptime and prevents workflow interruptions. Certified rugged to endure any work conditions with 1.5m drop to concrete per MIL-STD-810G and IP67 protection rating.

DEEP INTEGRATION

IPC and Google Pixel’s core teams are deeply integrated and developed the LPG in conjunction to provide the highest reliability, greater mobility, and the best user experience.

TOTAL COST OF OWNERSHIP

With lower hardware costs and no long-term contracts, there won’t be any surprises, supply chain delays, or hidden fees. Powered with Google’s tech stack and 7 years of security updates, companies can leverage the AI Wedge App and rely on the IPC support team for maintenance.

ENTERPRISE JUMPSTARTS

Tired of contracts and slow supply chains? Easily switch to LPG. No development or license required to enable LPG and the AI Wedge App – our no cost data toolkit – making it easy to integrate smart data capture into your applications. Leverage existing talent stack and IPC’s integration experts, test product before purchase, and access pre-built AI modules for out-of-the-box deployments.

BESPOKE PARTNERSHIPS

Have a unique use case or business challenge? Partner with IPC and leverage our 30+ years of expertise to bring your brand’s mobility visions to life through demos, POCs, legacy migrations, and custom hardware – including cases and accessories.

Enterprise Grade, In Any Shade

Rep your brand in the palm of your hand with LPG smart cases for Google Pixel – customizable with case colors to match your company logo

Accessories for Additional Power and Comfort

Pistol Grip

5-Device Charger

4-Device and 4-Battery Charger

High-Density Charging Rack

Product Model	Part Number	Description
LPGE	LPGE-ZS2DHF-PX8A	Linea Pro G Enterprise, Zebra Standard Range, HF RFID (NFC) for Google Pixel 8a
LPGE	LPGE-ZA2DHF-PX8A	Linea Pro G Enterprise, Zebra Extended Range, HF RFID (NFC) for Google Pixel 8a

State-of-the-Art Data Capturing for Businesses of All Kinds
