INSIGHT Standard

Easy device integration

Create your INSIGHT account and begin connecting your scanners to INSIGHT software. Our plug-and-play connectivity solutions make it easy to pair and manage your devices using the INSIGHT Mobile Android application, INSIGHT Mobile iOS SDK, or Gateway to cover the rest.

Configuration tailored to your needs

ProGlove devices can be manually configured to your scanning process. Integrating your shop floor layouts, warehouse workflow rules and processes is easier than ever. Scan a barcode or utilize your MDM system to update and apply the best configuration setting to your devices.

Deploy with the latest downloads

Download your way to more reliable operations. No more searching for the latest firmware version. Stay up to date by manually improving the functionality and firmware version of your devices.

Free with every ProGlove wearable scanner

INSIGHT Standard

- Create your INSIGHT account & begin **integrating** ProGlove devices
- Manually **configure** Scanners, Gateways, Mobile applications
- **Deploy** with the latest downloads

Upgrade for more advanced features!

INSIGHT Visibility

- Manage devices remotely across multiple locations
- Monitor device usage across your warehouse
- Find lost devices and view battery charging status online

INSIGHT Analytics

- Discover errors by converting raw data into action
- Analyze with automated reports
- Act & enhance shop floor integrations with more process context

PROGLOVE

Configure, monitor & track
ProGlove device fleets

Configure & remotely update devices

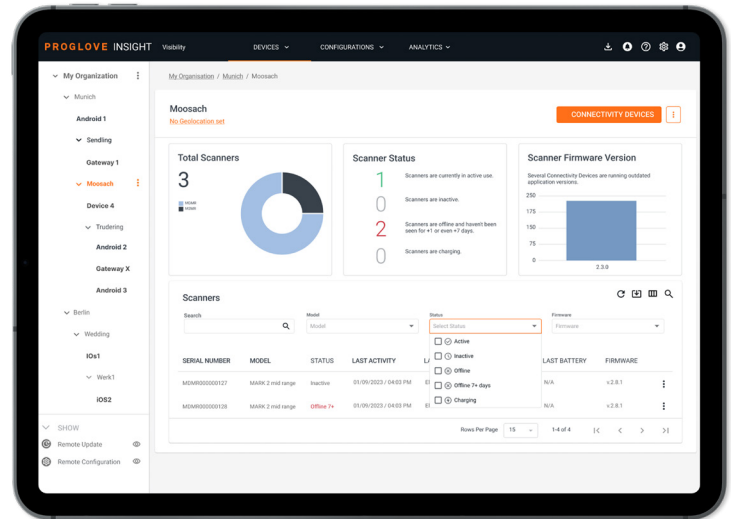

Monitor device usage & battery status

Track devices & avoid costly replacements

INSIGHT Visibility

A single dashboard to optimize
ProGlove device fleets.

ProGlove

INSIGHT Visibility

Software to ensure your shop floor is production ready!
Configure, monitor & track large ProGlove device fleets.

Remote Updates

Spend less time configuring & updating device fleets & more time improving the performance of your ProGlove scanners, Gateways & mobile devices. Remote updates make applying configurations to large groups of devices easier. Conveniently schedule updates between shifts & avoid shift interruptions & down time all together - with just the push of a button!

Device Monitoring

Ensure your device fleet is ready at the start of every shift! View all critical metadata, device usage and battery charging status from a single dashboard. Or enhance your view even more by integrating INSIGHT within your existing MDM system.

Lost & Found

Keep track of devices & see your productivity increase with every shift. Find lost devices & avoid scanner replacement costs all together! Easily track where devices are, which are in use, inactive or in the charger.

Contextualized data you can act on

INSIGHT Analytics

Your data engine to **discover, analyze and act on** contextualized data for actionable insights.

Discover issues on your shop floor

With our data deep dive projects you can easily find those hard-to-identify issues across your shop floors. Recognize wasted time within your process caused by issues and errors. Discover realistic goals for time and motions studies from KPI's based on actual process executions. Learn how to leverage cost savings from identified issues.

Analyze to empower data-driven decisions

Avoid spending hours manually creating excel reports to analyze productivity. INSIGHT Analytics provides a collection of narrative reports and alerts to quickly monitor issues on your shop floor. Your analysts will be able to leverage unique data points at a granularity they are unable to get from current information systems.

Act and gain more productivity

Enhance your existing shop floor integrations to unleash the full power of process analysis. INSIGHT Analytics helps you to continuously benchmark processes, increase productivity and improve the ergonomics of your workflows. Use our REST APIs to integrate with more services or plug INSIGHT into your own data warehouse, dashboard visualization tool, business intelligence platform or IoT application.
