

Enterprise Browser

POWERFUL ANDROID-BASED APPLICATION DEVELOPMENT TOOL

Enterprise Browser provides the best graphical interface on Zebra mobile devices for your workers to execute their daily tasks with ease. Beyond an interface, use Enterprise Browser as an optimized solution for web-based app development that leverages built-in Zebra data capture features through Zebra's API library.

Enterprise Browser Features

Drives Improved Productivity

With ready-to-use features, you can quickly leverage SAP APIs and more than 150 Zebra Mobility DNA device-specific APIs to save time and money in your operations.

**Built on Standards—
No Proprietary Technologies**

Open-source standard technologies, such as HTML, CSS and JavaScript, allow your teams to build powerful applications using standard web skills and provide access to the world's largest web community.

Supports All Zebra Enterprise Devices

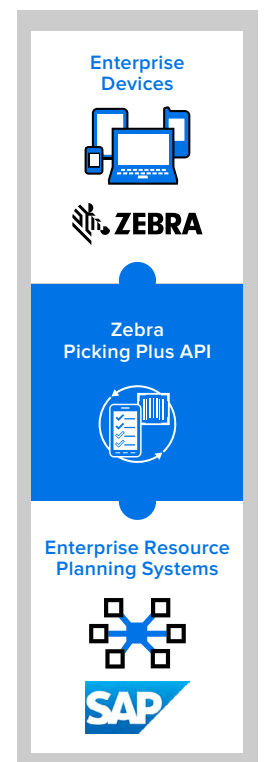

No matter what types of Zebra devices you need in your business, Enterprise Browser supports them all: mobile computers, tablets, kiosks, point-of-sale devices, wearables and vehicle mounts.

Zebra Picking Plus API Set

The Zebra Picking Plus API set available with an Enterprise Browser license simplifies warehouse workflows, enabling real time SAP EWM Cloud database updates from mobile devices anywhere on the floor.

Enterprise Browser Features (cont.)

Operating System “Lock-Out”

Hides access to distractions such as web-browsing and games; simplifies user interface and eliminates the risk of unauthorized changes to device settings.

Protection from OS Market Uncertainty

Devices and platforms can continue to churn without impacting your business—these OS-agnostic applications work on the Zebra platforms of yesterday, today and tomorrow.

Thin Client Architecture

Simplifies device and application deployment as well as support with instant “zero-touch” application updates; ensures version consistency, protects worker productivity and decreases support time and cost.

Extensive Logging Capability

Easily capture logging information for easy troubleshooting, reducing support time and cost.

Create Consumer-Style Apps for Business

Without OS constraints to impact app design, a graphical user interface can be created that is every bit as engaging, intuitive and interactive as today’s consumer applications. Example use cases include, but are not limited to, Enterprise Resource Planning (ERP) in the warehouse management space; price lookup and inventory count applications that are used within the retail sector; self-directed shopping applications; and more.

Faster Deployment

Develop and launch mobile applications with ease. Leverage web development resources to get to market more quickly and reap benefits sooner versus traditional native Android application development.

Enterprise Browser Specifications

Supported Platforms	Device Capabilities		Technologies
Android-supported	Barcode scanning	File management	HTML 5
	Camera	Alerts	CSS 3
	Bluetooth®	Audio and video	JavaScript
	Printing	MSR	
	Indicators	Signature capture
